REDEFINING LIVES

7 Early Warning Signs of Autism

1 **Limited Eye Contact**
Rarely looks toward faces during interaction.

2 **No Response to Name**
Often doesn't respond when called.

3 **Delayed Speech**
Words or language may develop later than expected.

4 **Limited Gestures**
Rarely points, waves, or shows objects.

5 **Reduced Social Interaction**
Less interest in shared play or interaction.

6 **Repetitive Behaviors**
Repeated movements or routines.

7 **Limited Pretend Play**
Less engagement in imaginative play.

EARLY IDENTIFICATION MATTERS
Every child develops differently. These signs do not necessarily mean a child has autism. Consult a qualified child development professional if you have concerns.

BOOK AN APPOINTMENT
Take the first step towards a brighter tomorrow.

Every child. Every step. Every success.

Chetna
Autism n Child development center
REDEFINING LIVES

COMMON REASONS FOR SPEECH DELAY

Understanding Your Child's Communication Development

1. **Hearing Difficulties**
Difficulty hearing sounds may affect speech and language development.

2. **Limited Interaction**
Less talking, reading and playing together can reduce language-learning opportunities.

3. **Excessive Screen Time**
Screen time may replace important face-to-face communication and interaction.

4. **Developmental Delays**
Some children develop communication skills more slowly than expected.

5. **Autism Spectrum Disorder (ASD)**
Some children may experience differences in social communication and interaction.

6. **Speech & Language Disorders**
Children may have difficulty understanding words or expressing their thoughts.

Early identification makes a difference!
